Hyderabad, India | Open to Remote & International Roles

Summary

Data and AI solutions professional with 9+ years of experience across analytics, financial services, and geospatial data. Builds AI-agent workflows, cloud data pipelines, and automation that remove manual effort: a zoning-research AI agent that cut manual research by approximately 60%, BigQuery pipelines that moved reporting from hours to minutes, and an AWS-to-GCP migration blueprint. Strong in Python, SQL, PostGIS, BigQuery, and LLM prompt engineering. Open to global remote roles and international contracts.

Technical Skills

AI & Automation: LLM Prompt Engineering, AI Agent Workflows, LangChain, Gemini API, Vertex AI, n8n, Power Automate, Workflow Automation

Data & Analytics: SQL, Python, BigQuery, MSSQL, Power BI, Alteryx, Excel, Dashboards & Reporting, Data Validation, Data Reconciliation

Cloud & Data Engineering: Google Cloud Platform (GCP), Cloud Functions, Terraform, IAM, ETL / Data Pipelines, Data Migration, Disaster Recovery

Geospatial: PostGIS, Spatial SQL, Spatial Joins, Geocoding, Address Matching, Coordinate Transformations

Languages: English, Hindi, Malayalam (professional); French (elementary)

Professional Experience

Senior Analyst - Location Intelligence
May 2024 – Oct 2026

Dun & Bradstreet *Hyderabad, India*

- Engineered national-scale spatial data pipelines in PostGIS and Python across millions of US building records for the Enhanced Building Footprint (EBF) product, covering data standardization, coordinate transformations, spatial joins, address matching, geocoding validation, and attribute enrichment.
- Architected an AI-agent workflow using Python and LLM prompt engineering to scrape municipal zoning data and auto-generate location intelligence outputs, reducing manual research effort by approximately 60% with approximately 70% accuracy in evaluation.
- Built and delivered EBF Pulse, a self-initiated AI quality-monitoring system combining an HTML dashboard, n8n automation, Gemini API summarization, and automated email digests; adopted by the team as a live data-quality reporting tool.
- Designed the AWS-to-GCP migration blueprint for a 6-month transition, defining storage architecture, access patterns, IAM, and disaster recovery standards with Terraform-driven automation; estimated 40% reduction in cloud management overhead.
- Built cross-cloud ingestion and transformation pipelines using BigQuery, Cloud Functions, and Python to replace legacy MSSQL workflows, improving reporting turnaround from hours to minutes with 99%+ pipeline reliability.

Risk Analytics Consultant
Sep 2022 – May 2024

Wells Fargo *Hyderabad, India*

- Designed and automated risk-tracking workflows and end-to-end U.S. banking reporting in Python (data extraction, Excel report generation, daily stakeholder distribution), feeding Power BI dashboards that gave management clearer visibility into risk metrics.
- Analyzed complex datasets with SQL to support risk reporting, data reconciliation, and business intelligence requirements.
- Reviewed data aggregation and programming models to ensure accuracy, consistency, and alignment with risk-reporting requirements.
- Partnered with risk managers, business stakeholders, data teams, and offshore teams to monitor production processes, resolve discrepancies, and improve reporting workflows in an Agile environment.

Senior Data Analyst **Dec 2020 – Sep 2022**
WPP *India*

- Analyzed SAS transaction data to build a business intelligence model supporting real-time reporting needs.
- Automated recurring reporting workflows using SQL and Excel, reducing manual effort and improving reporting consistency.
- Investigated and resolved data-flow integrity issues and ran reconciliations to keep reported outputs accurate.
- Delivered metrics reports and stakeholder presentations that informed campaign and resource-allocation decisions.

Assistant Manager - Reporting and Analytics **Jan 2020 – Dec 2020**
Home Credit India *Gurugram, India*

- Managed reporting and analytics activities, aligning deliverables with business requirements and operational priorities.
- Established internal controls, workflows, and policies for tracking, reconciling, and reporting; supported data validation to improve report reliability.
- Analyzed reports to identify early-warning signals (unusual trends, patterns, process gaps) and recommended corrective actions.
- Coordinated with business stakeholders to clarify requirements, resolve data discrepancies, and streamline recurring reports.

Associate Consultant **Dec 2018 – Jan 2020**
Capgemini Invent *New Delhi, India*

- Worked with business partners to understand objectives and deliver reporting, ad-hoc data extracts, and analysis.
- Analyzed large datasets and built visualizations and dashboards using Excel and SQL.
- Presented findings and recommended optimizations to clients, ran weekly workflow calls, and managed team status reporting for the project manager.

Data Analyst **Nov 2017 – Nov 2018**
Strategic Learning Solutions Pvt Ltd *Gurugram, India*

- Investigated and resolved data-flow integrity issues across databases and updated systems to streamline data collection.
- Documented business rules and use cases from requirements analysis.
- Built Excel reports delivering metrics to stakeholders to guide resource-allocation decisions.

Projects

- **Project Aegis – Flood Risk Intelligence:** Developing a district-level flood-risk assessment initiative combining environmental evidence, geospatial intelligence, and AI to help NGOs and emergency-response teams assess flood threats.
- **AI Agents Workflow Automation:** Designed AI-enabled workflows for municipal zoning research and location intelligence, automating information collection and structured output generation.

Education

Bachelor of Technology in Electrical and Electronics Engineering ***2013 – 2017***
Federal Institute of Science and Technology

Certifications

- Google Project Management Professional Certificate | Prompt Engineering for ChatGPT – Vanderbilt University | IT Automation with Python – Coursera | Python for Data Science – IBM | GIS for Climate Action | Product Management Fundamentals
